

CS 261  
Xiaohan Zeng  
04/04/2015

My name is Xiaohan Zeng. I came from China and got my master of Landscape Architecture degree in University of Idaho 2 years ago. Right now I live in Redmond and work for a Landscape design firm in Seattle WA. I am in post-bachelor 1.5 year track and hopefully I can graduate this winter. I take Data Structure, Intro to Database and Web Development 3 classes this semester.

I did UX design part in some of my friends' projects last year. When I work with them, I really enjoy the process and get to know some programming languages. OSU online program is great for me because I can still work as a part-time designer and learning CS after work. I hope I can become a developer who can also do or understand UX design after I graduate. One of the most important reasons for me to start this degree is that I think in 20 years if you cannot code or cannot understand it, you are similar to person who cannot use computer today. The connection between our life and technology will be stronger and stronger.

I really like drawing and all Miyazaki hayao' movies. I also enjoy the outdoor. Hike, bike and ski! I would like to join a study group, and my study schedule is 4pm-11pm (PST) . Looking forward to work with u.
